Goal: Install a license plate capture camera and an overview camera on each side of the entrance.

Customer's responsibility: Allow access to all areas necessary to complete the below proposal. Provide power on each side for camera equipment.

Delcollo Security Technologies (DST) Responsibilities: Provide a proposal as outlined below.

Weather proof box and DVR camera recorder - one on each side

DVR recorders

weatherproof enclosers

Wifi connectivity to DVR

HP laptop

Delcollo will furnish and install two Hikvision 4 port, 4 Terabyte (TB) camera recorders. This unit supports up to 4 digital/IP cameras at up to 8 Mega Pixels (MP) per camera.

One weather proof enclosure will be provided and mounted by the existing electrical equipment. This box will house the DVR recorder and a 110v outlet (one for each side).

Two Wireless Access point will be installed to connect to both DVR's from the entry area. One Hewlett Packard (HP) Laptop and laptop case is supplied for viewing the camera system. The laptop will be loaded with the camera software and configured for viewing and playback of the cameras.

Note: without Internet the cameras must be viewed from the entrance area via laptop.

2 Overview cameras – 8MP exterior turret cameras with infrared lighting (IR)

Delcollo will furnish and install two (2) turret cameras. These cameras will give a overview picture of the entrance area See camera layout on the last page.

2 LPR cameras – 2MP Bullet camera with License Plate Recognition (LPR) and infrared lighting (IR)

2MP License plate camera

Delcollo will furnish and install two (2) exterior bullet cameras with license plate recognition capabilities (one per side). See camera layout on the last page.

Electrical outlet, trenching and 10 foot camera pole

Delcollo Electric will provide one 110 volt electrical outlet at each DVR (weatherproof enclosure). One new breaker will be installed in the existing breaker box for the camera outlet. (Note: Aspen to provide a new electrical service to the one side before installation).

Delcollo Electric will trench to the pole location and install $\frac{3}{4}$ PVC conduit from the pole to the weatherproof enclosure/DVR.

Delcollo Security will mount 1 License plate camera and one overview camera per pole and run associated wiring.

The new camera pole will be a 10 feet tall 4 inch square aluminum direct burial pole.

Total Installation Investment \$12,699.00
